Civic Communications

Transfigure Technologies Pvt. Ltd.

Problems

The current ecosystem of civic information delivery requires significant intervention.

Multiple channels for civic data delivery

Existing data is scattered across many government channels

Difficult to understand technical jargon

Public information can use language that is difficult to understand for a layperson

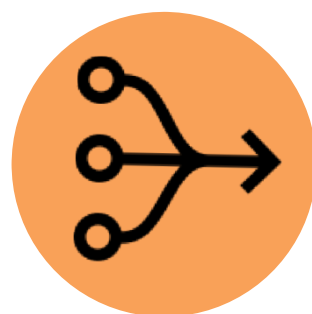

Local level information about basic services

Citizens often find it hard to obtain correct information about basic municipal services in their immediate localities

Solution

We aim to provide citizens with a one stop information platform for accurate and easy-to-understand civic alerts and neighbourhood level data insights

Consolidated Information Channel

Gather first-hand data/information from civic bodies and disseminate it through a consolidated platform as location based municipal service alerts

Early Warning and Response System

Guide the residents about upcoming service changes and disruptions while serving as an early preparedness and response system

Neighborhood Profiles

Educate citizens on the demographic and livelihood statistics of their neighborhood in an easy-to-understand format

Who is it for

Citizens

Any person who needs
access to their local civic
alerts and insights

Local Govt. Agencies

Local government agencies
who want to put their data for
a wider public reach
