WASTE MANAGEMENT
COMPANY

The Problem

- Poor waste management system
- Inefficient and old waste management system.
- Only 14% -20% of the waste is treated.
- Low Waste segregation.
- Low Resource recovery.

- India accounts for roughly 18 percent of the world's population and **12 percent** of global municipal solid waste generation.
- **Between 400,000 and 1 million people are dying** as a result of such mismanaged waste. (The guardian).
- 90% of waste in India is believed to be dumped in an unsatisfactory manner.(Royal society).

We aim to provide one stop solution for managing waste and disposing waste.

NGT FINE FOR POOR WASTE MANAGEMENT

SECTIONS NGT slaps penalty of 12,000 crores on Maharashtra for violation of environmental norms in state

Continuing damage is required to be prevented in future and past damage is to be restored, said the NGT.

The bench of Justice Adarsh Kumar Goel while passing the direction said that award of above compensation had become necessary under section 15 of the NGT Act to remedy the continuing damage to the environment and to comply with directions of the Supreme Court requiring this Tribunal to monitor enforcement of norms for solid and liquid waste management.

The National Green Tribunal (NGT) on Thursday imposed Environmental Compensation of Rs 12,000 crores on the state of Maharashtra for allegedly not managing solid as well as liquid waste management causing harm to the environment.

The fine on the state was imposed under section 15 of the NGT Act.

The bench of Justice Adarsh Kumar Goel while passing the direction said that award of above compensation had become necessary under section 15 of the NGT Act to remedy the continuing damage to the environment and to comply with directions of the Supreme Court requiring this Tribunal to monitor enforcement of norms for solid and liquid waste management.

NGT imposes Rs 3,825 crore penalty on Telangana for poor urban waste management

The tribunal's principal bench in New Delhi, after hearing the issue on Sept 29, suggested that Telangana raise funds by imposing user charges on households and businesses for discharging the waste.

NGT imposes Rs 3000 crore fine on Rajasthan government for improper waste management

The bench suggested that the government raise funds by imposing user charges on households and businesses for discharging the waste.

ARTICLES

NGT: Punjab to pay Rs 2,180 crore fine for poor solid waste management

Waste Management

- SOLID WASTE MANAGEMENT
- SYMPTOMS OF WASTING DISEASE
- HAZARDOUS WASTE DISPOSAL
- WASTE MANAGEMENT SERVICES
- WASTE RECYCLING COMPANIES

OTHER PROBLEMS

Target Customers

Societies and urban local bodies

Societies with a larger number of peoples panchayats municipal bodies etc.

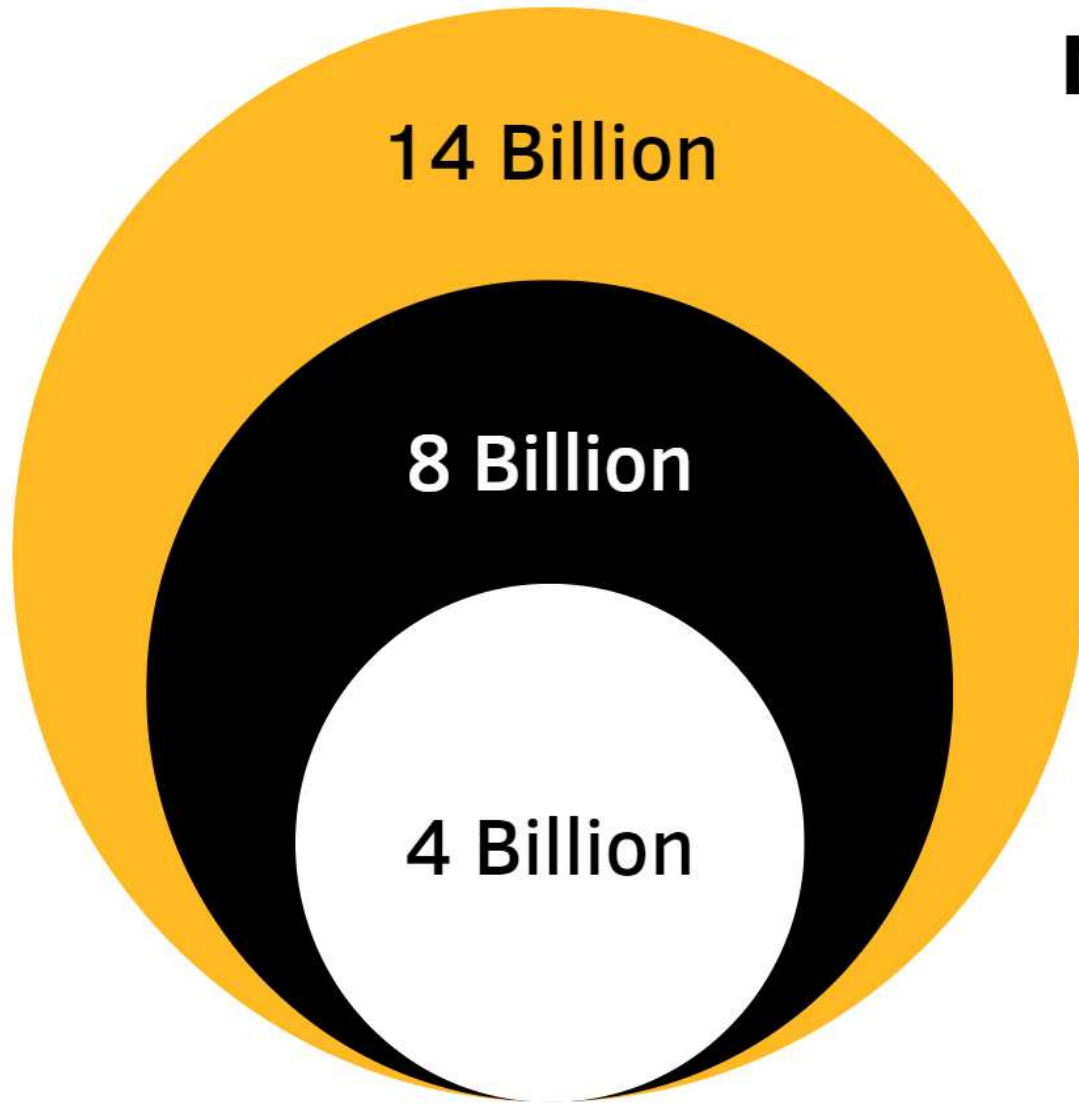

Institutes

Institutes like colleges, universities, schools, offices, markets, etc.

local partners

Recyclers, partners from unorganized sectors like kabadi walas ,gas companies etc.

Size of the waste management Market

-  Total Available Market (TAM):
14 BILLION USD
-  Serviceable Available Market (SAM):
8 BILLION USD
-  Serviceable Obtainable Market (SOM):
4 BILLION USD

About Us

We are The waste management company

- We offer innovative waste management services to societies, Institutes, and Urban local bodies .We bring out an cost effective management system for resource recovery and converting waste to wealth .

OUR SERVICE

Provide waste management service to societies, institutes, organizations, stations, etc. in a cost effective mannner

WASTE COLLECTION

- Data-based waste collection service for efficient waste collection from the source.
- it will help to choose the type of vehicle and the route for waste collection of vehicles.

SEGREGATION AND TREATMENT

Segregation of waste into different categories for further treatment of waste. For better resource recovery.

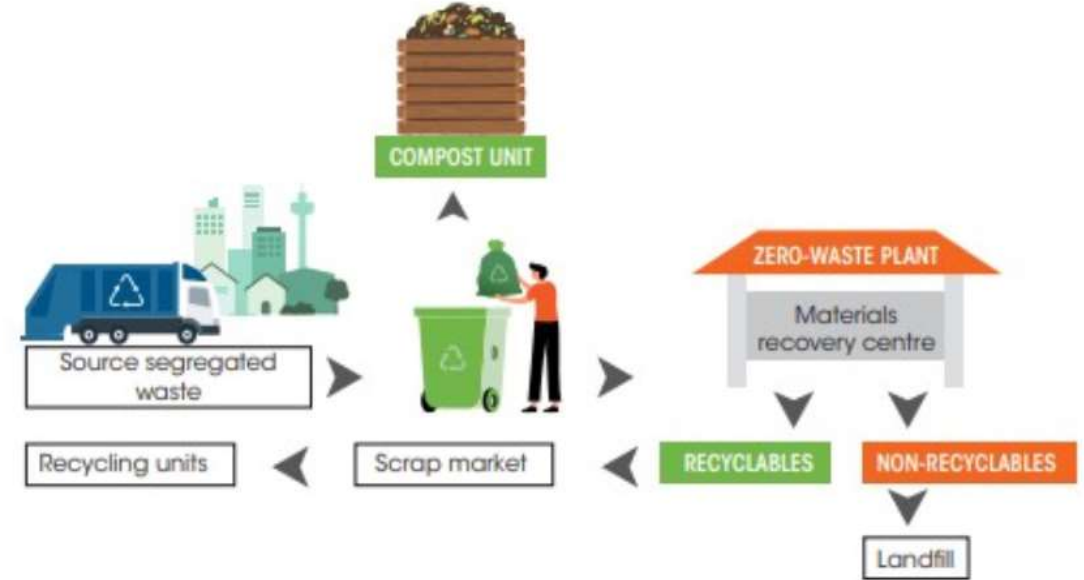

SELLING OFF

Selling of recyclable waste to recyclers like plastic, metals, paper, etc.
Biogas and compost.
Treated waste materials.

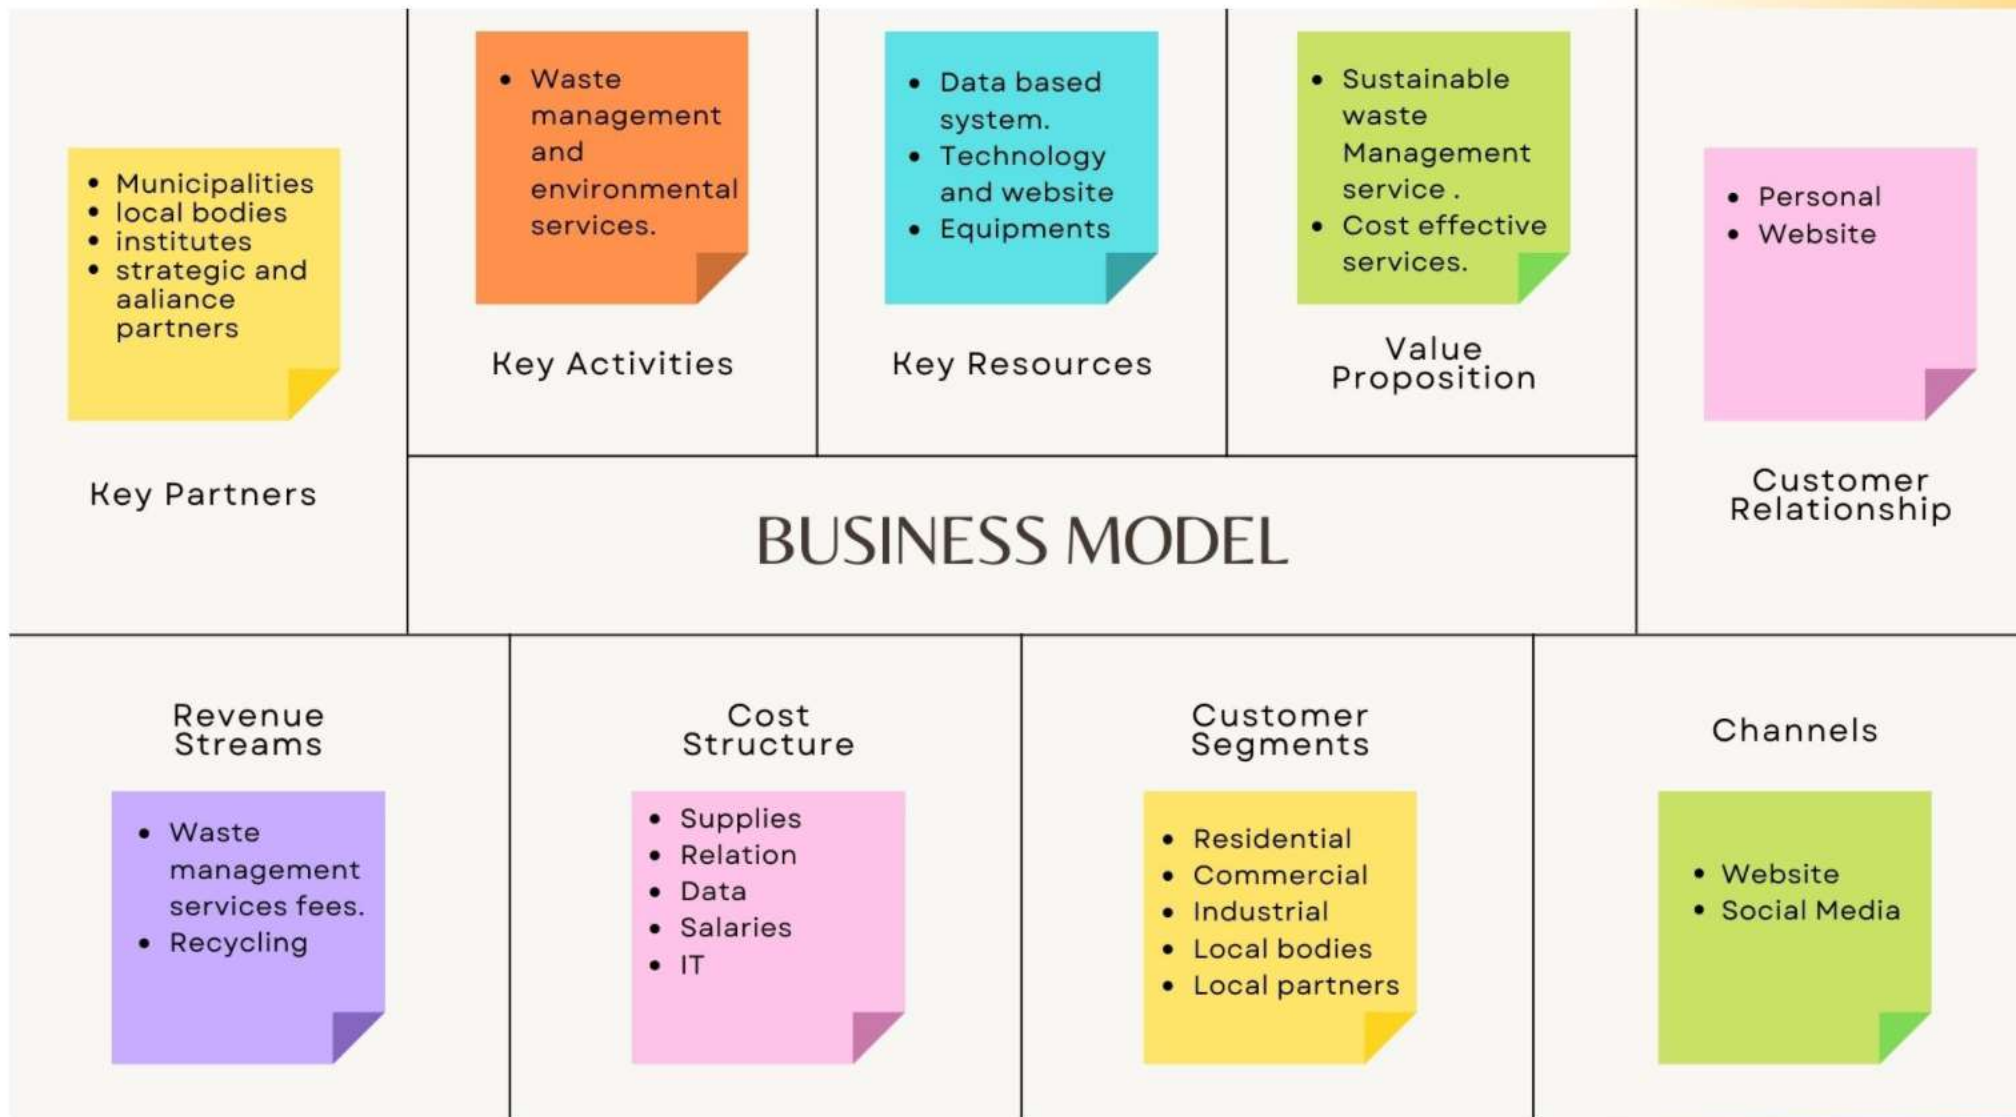

Cradle-to-grave model of waste management

Spread awareness

social media channel and handles

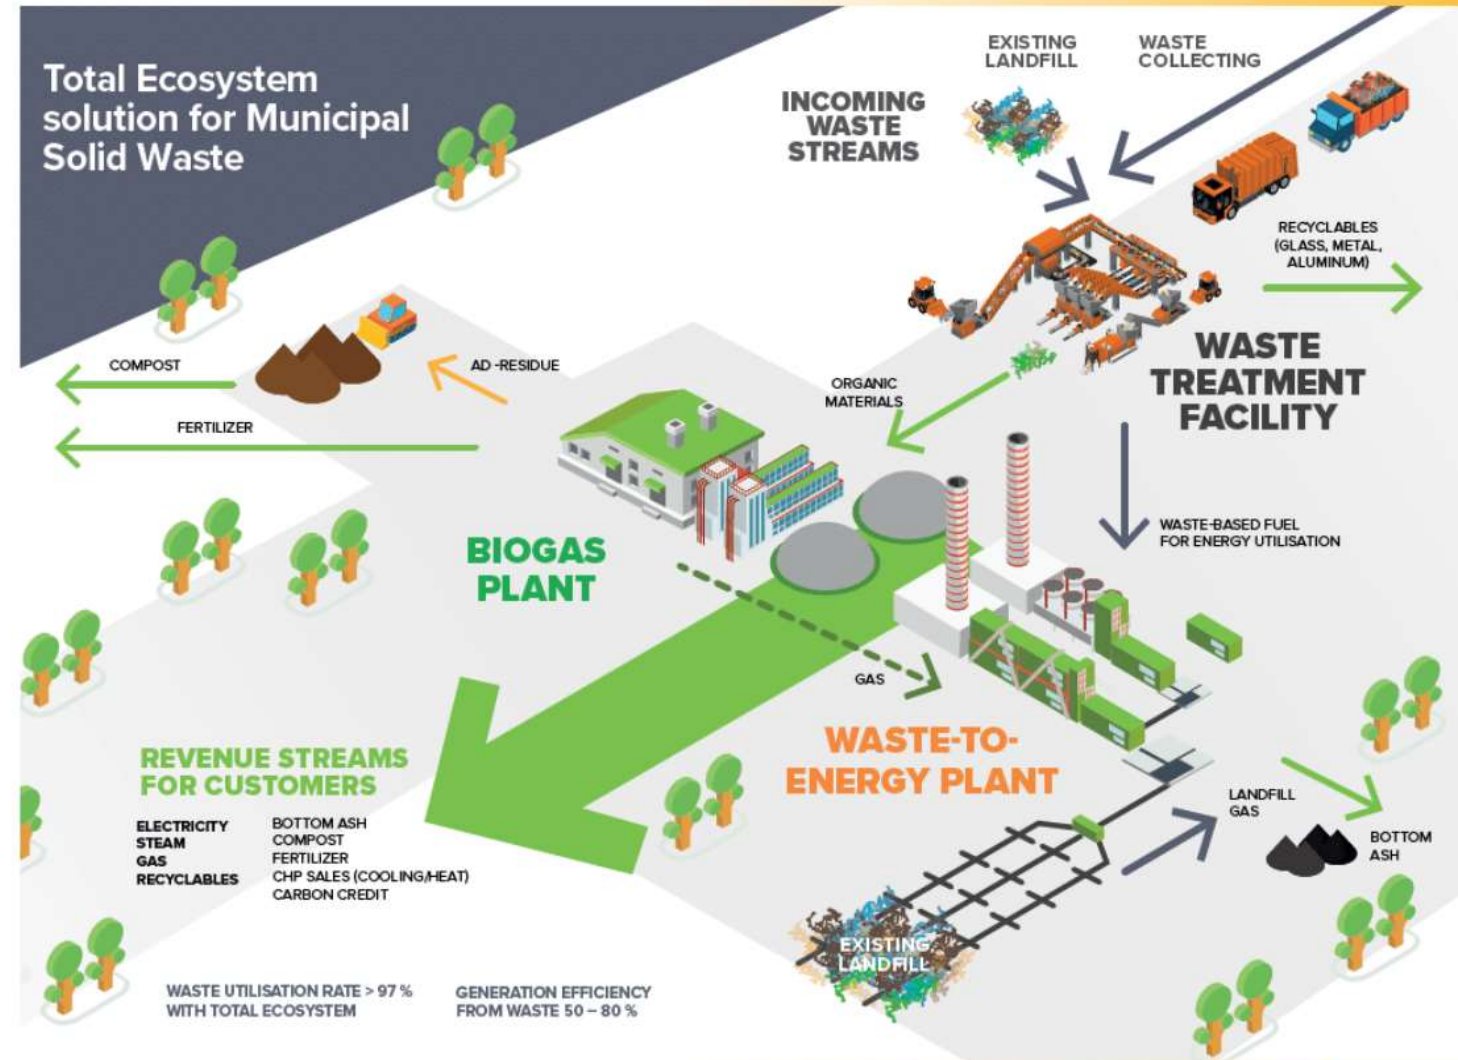

Source of revenue

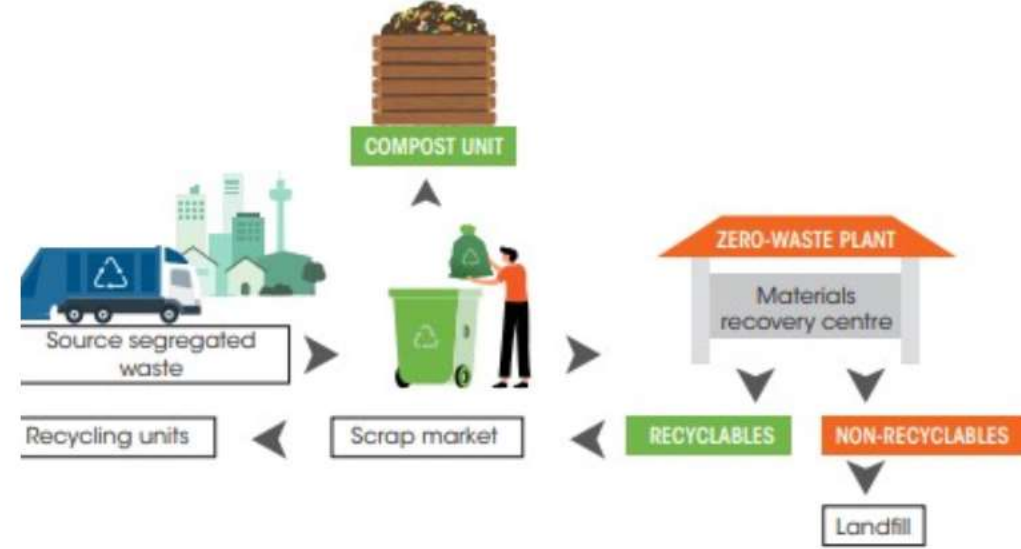

- Providing Waste Management Services.
- Monetizing Waste By Selling Recyclable Waste.
- Selling Compost, Biogas, Fertilizers Etc.

USP

COST EFFICIENT TRANSPORTATION

- An optimized data-based collection of waste.
- Decentralized waste management system.
- the smart fleet of EV vehicles connected and loaded with sensors for data monitoring.

Source: Mysuru City Corporation

DECENTRALIZED WASTE MANAGEMENT SYSTEM

- Decentralized units reduce labor costs.
- low maintenance.
- Consume lesser area and less infrastructural cost.
- Not limited to urban areas

RESOURCE RECOVERY

- Segregation results in a higher treatment and resource recovery rate.
- Bio-gas and composting for organic waste.
- Recovery of recyclable waste materials.
