

## **PROBLEM**

- To bridge the gaps in packaging, significant gaps in sustainability, (Traditional Packaging Material) which leads to resulting in high packaging costs and a large carbon foot prints.
- Would have to create their own wastemanagement system.
- Large pooling of leftover material.

## **ABOUT US**

The need for sustainable packaging is growing worldwide, **from July 2019** we committed to deliver the eco-friendly products & monitor the entire process of supply chain packaging. This ensures that we can achieve our sustainability vision, empowering ourselves & helping our customers to become carbon-neutral and a carbon negative organization.

- BH Bond helps to provide sustainable design solutions with less to zero carbon footprint.
- 100% Made in India, with motto of Vocal for Local.
- Member of the "Indian Green Building Council"
- Start-Up India Recognition, Award.
- 2021, Go Global Front Runner Manufacturer Award.

## **SOLUTION**

#### **CLOSE THE GAP**

- Lower use of disposable or single use packaging to help keep the environment clean & lower our Carbon Footprint.
- Help at the reduce in-transit damages and contribute to quality goal.
- Reduce handling of parts when sent to a manufacturing line directly.

#### **COST SAVINGS**

Reduce expenses by replacing the single time application of products into the multiple applications.

#### **CIRCULAR ECONOMY**

After complete product cycle or application we buy back, and recycle into the new products.

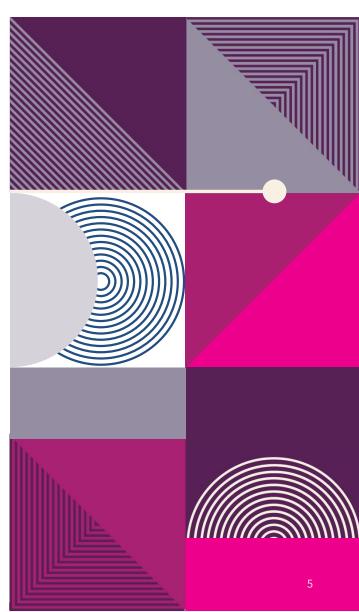

# **PRODUCTS**

#### **RESEARCH**

We based our research on client requirments with flexible approach.

Minimalist and easy to use design as per client specifications.

# PRODUCT HAND OVER

Shipping of material to client via dedicated vehicle mode.
